SUBJECT INDEX

Acquired immunodeficiency syndrome. *See Human immunodeficiency virus (HIV) infection*
Albumin
  deficiency of, in enteral nutrition, diarrhea and, 84 (abstract)
  in nutritional support, 124 (abstract)
Alcoholic liver disease, anthropometry in, 197 (abstract)
Amino acid forearm flux, in head trauma, 157 (abstract)
Amino acid profile, for enteral formulas, 159 (abstract)
Amino acids, branched-chain, elevation of, with postoperative enteral hyperalimentation, 160 (abstract)
Anorexia nervosa, total parenteral nutrition in, 183
Anthropometry
  in alcoholic and nonalcoholic liver disease, 197 (abstract)
  in gastrostomy-fed developmentally disabled children, 162 (abstract)
  vs. ultrasound and computed tomography, in nutritional assessment, 161 (abstract)
Antioxidants, in health maintenance, 19
Ascorbic acid stability, in total parenteral nutrition solutions, copper and, 194 (abstract)
A.S.P.E.N.
  new strategic plan, 243
  Philip J. Schneider's farewell as editor of *Nutrition in Clinical Practice*, 205
  Standards for Nutrition Support: Hospitalized Patients, 206
  terminology guidelines and standards, 1
Aspiration, in enteral nutrition, glucose content of tracheal aspirate and, 199 (abstract)

Bacterial translocation, across intact ileum, intestinal mucus and, 158 (abstract)
Bioelectrical impedance measurement, of body composition, in malnourished children, 85 (abstract)
Bone marrow transplant
  enteral nutrition after, in children, 140
  glutamine-supplemented parenteral nutrition in, 198 (abstract)
  veno-occlusive disease after, vitamin E and glutamine for, 16
Bronchopulmonary dysplasia, in infants, dexamethasone effects on protein metabolism in, 82 (abstract)
Burn patients
  γ-linoleic acid–enriched lipid emulsion in, effects of on plasma n-6 fatty acid and prostaglandin biosynthesis, 80 (abstract)
  ventilated, continuous measurement of energy expenditure in, 157 (abstract)

Calorie requirements, estimation of, for ventilated obese patients, 230
Carnitine, valproic acid–induced metabolic changes and, 193 (abstract)
Catheter
  femoral, infection of, in total parenteral nutrition, 60
  low umbilical artery, enteral nutrition with, in preterm infants, 126 (abstract)
  peripherally inserted central, endothelial thrombus formation in, 120
Central nervous system ischemia, nonglucose calorie sources and, 200 (abstract)
Chemical scores, for enteral formulas, 159 (abstract)
Children. *See Pediatrics*
Chronic lung disease, in premature infants, early IV lipid administration and, 40 (abstract)
Chronic obstructive pulmonary disease, diet-induced thermogenesis in, 127 (abstract)
Client education, for home care, 37
Clinical privileges, for dietitians, 98
Computed tomography, for subcutaneous fat measurement, vs. skinfold calipers and ultrasound, 161 (abstract)
Copper, ascorbic acid stability in TPN solutions and, 194 (abstract)
Correlation coefficients, for calorie requirement estimation, for obese mechanically ventilated patients, 230
Corticosteroids, effects of on protein metabolism, in preterm infants with bronchopulmonary dysplasia, 82 (abstract)
Cystic fibrosis
  double lung transplant in, nutrition in, 67
  prolonged parenteral nutrition in, 73
Cytokines, elevated, in infants with sepsis and necrotizing enterocolitis, 123 (abstract)

Developmental disabilities, gastrostomy feeding in, weight gain and triceps skinfold fat mass after, 162 (abstract)
Dexamethasone, effects of on protein metabolism, in preterm infants with bronchopulmonary dysplasia, 82 (abstract)
Diarrhea
  in enteral nutrition, hypoalbuminemia and, 84 (abstract)
  small intestinal repair after, dietary nucleotides and, 160 (abstract)
Diet-induced thermogenesis, in chronic obstructive pulmonary disease, 127 (abstract)
Dietitians. *See also Nutrition support team*
  clinical privileges for, 98
  in neonatal intensive care unit, 85 (abstract)
Double lung transplant, in cystic fibrosis, nutrition in, 67

Educational materials, for home care, 37
Elemental diet, in pancreatitis, 43 (editorial), 45
Endothelial thrombus formation, in peripherally inserted central catheter, 120
Energy expenditure
  in chronic obstructive pulmonary disease, 127 (abstract)
  continuous measurement of, in ventilated burn patients, 157 (abstract)
  in head trauma, forearm amino acid flux and, 157 (abstract)
Enteral formulas
  chemical scores for, 159 (abstract)
  FDA regulation of, 4 (editorial), 8
  generic, 238
  nosocomial infections in critical illness and, 159 (abstract)
  viscosity of, pectin and temperature and, 125 (abstract)
Enteral hyperalimentation, postoperative, increased branched-chain amino acid levels and, 160 (abstract)
Enteral nutrition. *See also Nutrition support*
  after pediatric bone marrow transplant, 140
  aspiration in, glucose content of tracheal aspirate and, 199 (abstract)
  in community hospital, nutrition support team for, cost benefits of, 196 (abstract)
  in critically ill patients, 158 (abstract)
  decision-making for, 104
  hypoalbuminemia in, diarrhea and, 84 (abstract)
  with low umbilical artery catheter, in preterm infants, 126 (abstract)
  morphine delivery via, 124 (abstract)
  in pancreatitis, 43 (editorial), 45
  superior mesenteric artery syndrome in, 86 (letter)
Erratum, possible folate deficiency with postsurgical infection, 79
Essential amino acid profile, for enteral formulas, 159 (abstract)

Fat, subcutaneous, measurement of, by skinfold caliper
  in alcoholic and nonalcoholic liver disease, 197 (abstract)
  in gastrostomy-fed developmentally disabled children, 162 (abstract)
  vs. by ultrasound and computed tomography, 161 (abstract)
Fatty acids, plasma n-6, postinjury synthesis of, gamma-linoleic acid–enriched lipids and, 80 (abstract)
FDA regulations, for enteral formulas, 4 (editorial), 8
Femoral catheter infection, in parenteral nutrition, 60
Folate deficiency, postsurgical infection and, 79 (erratum)
Foodborne infections, prevention of, in liver transplant patients, 194 (abstract)
Formulas. *See Enteral formulas; Total parenteral nutrition solutions*

Gastric emptying, in different parenteral nutrition regimens, 195 (abstract)
Gastrostomy feeding. *See also Nutrition support*
  gastroesophageal reflux during, 41 (abstract)
  percutaneous endoscopic, early tube dislodgment in, 125 (abstract)

superior mesenteric artery syndrome and, 86 (letter)
Generic enteral formulas, 238
Glucose
spinal cord ischemia and, 200 (abstract)
in tracheal aspirates, as aspiration marker, 199 (abstract)
Glutamine
in parenteral nutrition, in bone marrow transplant, 198 (abstract)
for veno-occlusive disease, after bone marrow transplant, 16
Gut barrier, intestinal mucus in, 158 (abstract)

Head trauma, amino acid forearm flux in, 157 (abstract)
Health care reform, nutrition support and, 1s-82s
Hemodiafiltration, continuous, urea removal during, 82 (abstract)
Hepatic disease
alcoholic and nonalcoholic, anthropometry in, 197 (abstract)
veno-occlusive, after bone marrow transplant, vitamin E and glutamine for, 16
Hepatic transplant
foodborne infection prevention in, 194 (abstract)
nutritional support in, 81 (abstract)
Hepatic veno-occlusive disease, after bone marrow transplant, vitamin E and glutamine for, 16
Home nutrition support
educational materials for, 37
managed care and, 26
nausea and vomiting in, in children, 189
Human immunodeficiency virus (HIV) infection
nutrition support in, 165 (editorial), 167
wasting in, 165 (editorial), 167
Hyperalimentation, postoperative enteral, increased branched-chain amino acid levels and, 160 (abstract)
Hypoalbuminemia, in enteral nutrition, diarrhea and, 84 (abstract)

Infants. *See also Pediatrics*
premature
bronchopulmonary dysplasia in, dexamethasone effects on protein metabolism in, 82 (abstract)
chronic lung disease in, early IV lipid administration and, 40 (abstract)
enteral nutrition in, with low umbilical artery catheter, 126 (abstract)
with sepsis and necrotizing enterocolitis, elevated cytokines in, 123 (abstract)
very low/extremely low birth-weight, weight changes in, 201 (abstract)
Infection(s)
elevated cytokines in, in infants, 121 (abstract)
femoral catheter, in total parenteral nutrition, 60
foodborne, prevention of, in liver transplant patients, 194 (abstract)
nosocomial, in critical illness, enteral formulas and, 159 (abstract)
postsurgical, folate deficiency and, 79 (erratum)
Interleukin-6, in infants with sepsis and necrotizing enterocolitis, 123 (abstract)
Intestinal mucus, in gut barrier, 158 (abstract)
Ischemia, central nervous system, nonglucose calorie sources and, 200 (abstract)

Joint Commission on Accreditation of Healthcare Organizations (JCAHO) standards, for nutrition care, 26

Limits of agreement, for calorie requirement estimation, for obese mechanically ventilated patients, 230
γ-Linoleic acid–enriched lipids, postinjury plasma n-6 fatty acid and prostaglandin biosynthesis and, 80 (abstract)
Lipids
early IV, for premature infants, 40 (abstract)
gamma-linoleic acid–enriched, postinjury plasma n-6 fatty acid and prostaglandin biosynthesis and, 80 (abstract)
in parenteral nutrition, in full-term infants, 84 (abstract)
structured, metabolic effects of, 89 (editorial), 91
Liver disease
alcoholic and nonalcoholic, anthropometry in, 197 (abstract)
veno-occlusive, after bone marrow transplant, vitamin E and glutamine for, 16
Liver transplant
foodborne infection prevention in, 194 (abstract)
nutrition support in, 81 (abstract)
Low umbilical artery catheter, enteral nutrition with, in preterm infants, 126 (abstract)
Lung disease
chronic obstructive, diet-induced thermogenesis in, 127 (abstract)
in premature infants, early IV lipid administration and, 40 (abstract)
Lung transplant, double, in cystic fibrosis, nutrition in, 67

Malnutrition
bioelectrical impedance measurement of body composition in, in children, 85 (abstract)
protein energy, clinical assessment of, 129 (editorial), 131
Managed care
home care and, 26
nutrition support in, 1s-82s
Mechanical ventilation, in obese patients, calorie requirements for, 230
Medical foods, FDA regulation of, 4 (editorial), 8
Microbial translocation, across intact ileum, intestinal mucus and, 158 (abstract)
Mobile nutrition support teams, 234
Morphine sulfate, compatibility of with enteral feeding products, 124 (abstract)
Mucus, intestinal, in gut barrier, 158 (abstract)

N-6 fatty acids, postinjury synthesis of, gamma-linoleic acid–enriched lipids and, 80 (abstract)
Nausea and vomiting, in children on home parenteral nutrition, 189
Necrotizing enterocolitis, elevated cytokines in, in infants, 121 (abstract)
Neonatal intensive care unit, nutrition services in, 85 (abstract)
Neonates. *See Infants; Pediatrics*
Nosocomial infections, in critical illness, enteral formulas and, 159 (abstract)
Nucleotides, small intestinal repair after diarrhea and, 160 (abstract)
Nutrition assessment
anthropometric
in alcoholic and nonalcoholic liver disease, 197 (abstract)
in gastrostomy-fed developmentally disabled children, 162 (abstract)
vs. ultrasound and computed tomography, 161 (abstract)
parameters for, 131
screening tool for, in community hospital, 197 (abstract)
Nutrition in Clinical Practice, Philip J. Schneider's farewell as editor of, 205 (editorial)
Nutrition services, in neonatal intensive care unit, 85 (abstract)
Nutrition support. *See also Enteral nutrition; Gastrostomy feeding; Parenteral nutrition; Total parenteral nutrition*
albumin in, 124 (abstract)
early initiation of, in children, 177
future directions in, 1s-82s
in HIV infection, 165 (abstract), 167
at home
educational materials for, 37
managed care and, 26
nausea and vomiting in, in children, 189
JCAHO standards for, 26
in liver transplant, 81 (abstract)
in obesity, 144
in pancreatitis, 43 (editorial), 45
in pediatric double lung transplant, in cystic fibrosis, 67
Nutrition support team
clinical privileges for, 98
current challenges for, 151
for enteral nutrition, in community hospital, cost benefits of, 196 (abstract)
literature review for, 123 (abstract)
mobile, 234
standards and rationale for, 220

Obesity
calorie requirements in, during mechanical ventilation, 230
nutrition support in, 144
Order forms, for pediatric/neonatal parenteral nutrition, 54

Pancreatitis, nutrition support in, 43 (editorial), 45
Parenteral nutrition. *See also Nutrition support*
gastric emptying time in, 195 (abstract)
glutamine-supplemented, in bone marrow transplant, 198 (abstract)
at home, nausea and vomiting in, in

children, 189
lipids in, in full-term infants, 84 (abstract)
pediatric/neonatal, order forms for, 54
prolonged, in cystic fibrosis, 73
Patient education, for home care, 37
Pectin, enteral formula viscosity and, 125 (abstract)
Pediatrics
bioelectrical measurement of body composition, 85 (abstract)
dexamethasone effects on protein metabolism in bronchopulmonary dysplasia, 82 (abstract)
dietitians in neonatal intensive care units, 85 (abstract)
early initiation of nutrition support in, 177
early lipid administration in preterm infants, chronic lung disease and, 40 (abstract)
elevated cytokines in critically ill infants with sepsis and necrotizing enterocolitis, 123 (abstract)
enteral feeding with low umbilical artery catheter, 126 (abstract)
enteral nutrition after bone marrow transplant, 140
lipids in parenteral nutrition in full-term infants, 84 (abstract)
metabolic changes with valproic acid, carnitine depletion and, 193 (abstract)
nutrition in double lung transplant in cystic fibrosis, 67
nutrition order forms for, 54
prolonged parenteral nutrition in cystic fibrosis, 73
weight change in very low/extremely low birth-weight infants, 201 (abstract)
weight gain and triceps skinfold fat mass in gastrostomy-fed developmentally disabled children, 162 (abstract)
Percutaneous endoscopy gastrostomy tubes, early dislodgement of, 125 (abstract)
Peripherally inserted central catheter, endothelial thrombus formation in, 120
Plasma n-6 fatty acids, postinjury synthesis of, gamma-linoleic acid–enriched lipids and, 80 (abstract)
Premature infants
bronchopulmonary dysplasia in, dexamethasone effects on protein metabolism in, 82 (abstract)
chronic lung disease in, early IV lipid administration and, 40 (abstract)
enteral nutrition in, with low umbilical artery catheter, 126 (abstract)
weight changes in, 201 (abstract)
Prostaglandins, postinjury synthesis of, gamma-linoleic acid–enriched lipids and, 80 (abstract)
Protein energy malnutrition, clinical assessment of, 129 (editorial), 131
Protein metabolism, dexamethasone effects on, in preterm infants with bronchopulmonary dysplasia, 82 (abstract)
Pulmonary disease
chronic obstructive, diet-induced thermogenesis in, 127 (abstract)
in premature infants, early IV lipid administration for, 40 (abstract)

Respiratory failure, sodium acetate, sodium lactate, sodium β-hydroxybutyrate infusion in, 83 (abstract)

Schneider, Philip J., steps down as editor of *Nutrition in Clinical Practice*, 205 (editorial)
Screening, nutrition. *See also Nutrition assessment*
in community hospital, 197 (abstract)
Sepsis, elevated cytokines in, in infants, 121 (abstract)
Skinfold measurements
in alcoholic and nonalcoholic liver disease, 197 (abstract)
in gastrostomy-fed developmentally disabled children, 162 (abstract)
vs. ultrasound and computed tomography, 161 (abstract)
Small intestinal repair, after diarrhea, dietary nucleotides and, 160 (abstract)
Sodium acetate, sodium lactate, sodium β-hydroxybutyrate infusion, in respiratory failure, 83 (abstract)
Solutions. *See Total parenteral nutrition solutions*
Spinal cord ischemia, nonglucose calorie sources and, 200 (abstract)
Standards for Nutrition Support: Hospitalized Patients (A.S.P.E.N.), 208
Steroids, effects of on protein metabolism, in preterm infants with bronchopulmonary dysplasia, 82 (abstract)
Subcutaneous fat, measurement of, by skinfold caliper
in alcoholic and nonalcoholic liver disease, 197 (abstract)
in gastrostomy-fed developmentally disabled children, 162 (abstract)
vs. by ultrasound and computed tomography, 161 (abstract)
Superior mesenteric artery syndrome, in tube-fed patient, 86 (letter)

Taurine, supplementation of, in trauma patients, 193 (abstract)
Temperature, enteral formula viscosity and, 125 (abstract)
Thermogenesis, diet-induced, in chronic obstructive pulmonary disease, 127 (abstract)
Thrombus, endothelial, in peripherally inserted central catheter, 120
Total nutrient admixtures, 114
Total parenteral nutrition. *See also Nutrition support*
in anorexia nervosa, 183
femoral catheter infection in, 60
in pancreatitis, 43 (editorial), 45
Total parenteral nutrition solutions, ascorbic acid stability in, copper and, 194 (abstract)
Tracheal aspirates, glucose in, as aspiration marker, 199 (abstract)
Transplant
bone marrow
enteral nutrition after, in children, 140
glutamine-supplemented parenteral nutrition in, 198 (abstract)
veno-occlusive disease after, vitamin E and glutamine for, 16
double lung, in cystic fibrosis, nutrition in, 67
hepatic
foodborne infection prevention in, 194 (abstract)
nutrition support in, 81 (abstract)
Trauma patients
gamma-linoleic acid–enriched lipid emulsion in, effects of on plasma n-6 fatty acid and prostaglandin biosynthesis, 80 (abstract)
taurine supplementation in, 193 (abstract)
ventilated, continuous measurement of energy expenditure in, 157 (abstract)
Triceps skinfold measurements
in alcoholic and nonalcoholic liver disease, 197 (abstract)
in gastrostomy-fed developmentally disabled children, 162 (abstract)
vs. ultrasound and computed tomography, 161 (abstract)
Triglycerides, structured, metabolic effects of, 89 (editorial), 91
Tube feeding. *See Enteral nutrition; Gastrostomy feeding*
Tumor necrosis factor, in infants with sepsis and necrotizing enterocolitis, 123 (abstract)

Ultrasound, for subcutaneous fat measurement, vs. skinfold calipers and computed tomography, 161 (abstract)
Umbilical artery catheter, enteral nutrition with, in preterm infants, 126 (abstract)
Urea removal, during continuous hemodiafiltration, 82 (abstract)

Valproic acid, metabolic changes with, carnitine depletion and, 193 (abstract)
Veno-occlusive disease, after bone marrow transplant, vitamin E and glutamine for, 16
Ventilation, in obese patients, calorie requirements for, 230
Viscosity, formula, pectin and temperature and, 125 (abstract)
Vitamin E, for veno-occlusive disease, after bone marrow transplant, 16
Vomiting, in children on home parenteral nutrition, 189

Weight change, in very low/extremely low birth-weight infants, 201 (abstract)
Weight gain, in gastrostomy-fed developmentally disabled children, 162 (abstract)
Weight loss
in chronic obstructive pulmonary disease, diet-induced thermogenesis and, 127 (abstract)
in human immunodeficiency virus infection, 165 (abstract), 167
